Mineral Insulated (Alumina) Metal Sheathed Thermocouples "SH" / "MH" with Dust and Moisture Proof Heads

The "SH" (standard) and "MH" (miniature) size cast aluminum series of thermocouples provide superior dust, moisture, and signal protection. All series include weatherproof housing with covers, a 1/2" NPT male thread for connections to thermowells, and 1/2" receptacle on the housing for conduit connections for the thermocouple lead wire. Additional features are O-ring seals and terminal blocks for easy lead wire connection. Optional alternative fittings are available.

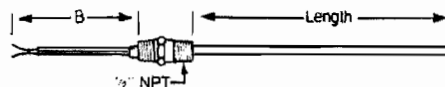

*Non-standard or exotic items please check with BJWE for price and delivery.

^Plastic housings come in both standard and miniature size heads.

Dual Element Probes: To order a dual element probe add prefix "DU". Please note for ungrounded junctions you must choose between "Common" UC or "Uncommon" UU internal junction. Example: DU-SH-J-SS-18UU-12

"RP" Replacement Element Thermocouples

Replacement element probes are available with mineral insulated metal sheaths, stripped ends (3" typical) and a 1/2" x 1/2" process fitting. To order replacement elements use the above ordering guide and add the suffix "RP". Example: MH-J-SS-18G-12-RP
