Note

1. The FDC05 (/M) series required a minimum 10% loading on the output to maintain specified regulation. Operation under no-load condition will not damage these devices, however they may not meet all listed specification
2. Simulated source impedance of 12uH. 12uH inductor on series with +Vin.
3. The ON/OFF control is option function. There are positive logic and negative logic. The pin voltage is referenced to negative input.
   To order positive logic ON-OFF control add the suffix-P (Ex: FDC05-24S05-P)
   To order negative logic ON-OFF control add the suffix-N (Ex: FDC05-24S05-N)
4. BELLCORE TR-NWT-000332. Case I: 50% Stress, Temperature at 40°C.
   (Ground fixed and controlled environment)
5. /M1 version is more efficient, therefore, it can be operated in a more extensive temperature range than standard and /M2 version.
6. Heatsink is optional and P/N: 7G-0020A.
7. Maximum value at nominal input voltage and full load of standard type.
8. Typical value at nominal input voltage and full load.
9. Test by minimum Vin and constant resistor load.
